Development Timeline: 2 monthss

- [La95truckingshow](#)

Achievement:

Increased user engagement by 70% through a dynamic web application with integrated database.

— Collaborated on the development of a dynamic web application, using HTML, CSS, Java, GitHub Flow, and Astro. My role focused on front-end development, creating a responsive and interactive website, and ensuring a seamless user experience. The project included efficient collaboration with my teammate, who handled the backend using Ruby and PostgreSQL, enabling robust data management and real-time updates.

Technologies: HTML, CSS, SASS, JavaScript ES6, GitHub Flow, Astro, Ruby, PostgreSQL

Development Timeline: 3 months

EDUCATION
